

Jose Daniel Oropeza Soria

Full-stack Software Engineer

With 4+ years of experience in the industry of Software Development. Currently working in the field of contact center software as a service that helps agents connect with their customers through our globally known platform.

I am passionate about creating code and that it generates an impact of value in people's lives. Technology is building the future.

During my career, I have had the opportunity to work with complex systems maintained by more than 70+ teams which allowed me to have a broader vision of software development for large applications. My passion for technology has driven me to work with people of diverse nationalities and cultures, providing me with valuable experience in cross-cultural communication and collaboration. I am a person who likes to do things in the best possible way. I have a big desire to contribute and expand my software engineering career by pursuing challenging projects to overcome my own limits. My ability to adapt to different work environments has allowed me to gain remote work experience, making me a versatile team member.

Work Experience

Software Engineer @ NICE April 2021 - Present

- Develop code and create unit tests with high standards for a world-class Contact Center.
- Meticulously migrate ASP.NET production pages to new Angular versions, leveraging new features while maintaining existing functionalities and improving the user experience.
- Conduct detail code analysis focusing on customer data, security, background optimizations, response times, and permissions for a seamless transition without compromising existing functionalities.
- Contribute to the implementation of the infrastructure architecture for the newly migrated Angular pages.
- Contribute to the CXone suite in ACD by creating reusable, decoupled, and maintainable components.
- Maintain code for ASP pages by addressing bugs, implementing new features, and creating API endpoints or database queries as needed.
- Review Pull Requests from other team members.

Full-stack Developer @ DOMUS SRL January 2020 - March 2021

- Developed functionalities using clean, maintainable, and readable code, adhering to high coding standards.
- Design and implement the entire CI/CD infrastructure of Domusfix web applications using GitLab, Docker and popular AWS services.
- Collaborated with the software architect and development team to meticulously design and implement the architecture of the entire Domusfix system.
- Coordinate technical meetings with other development teams for seamless integration with the other projects.
- Prepare the code, resolve errors and deploy the code to production for each release.
- Engaged in frequent communication with the CEO, participating in multiple calls to discuss the direction of the Domusfix projects.
- Designed mockups to meet client needs and presented them to clients for feedback and approval.

Full-stack Developer @ TRUEXTEND July - October 2019

- Development / BugFixing of web applications and API REST Backends.
- Participation in Sprint Planning, Retrospective, Grooming and Daily Scrum.
- Software development using good practices such as clean code, refactoring, exception handling and documentation.
- Preparation of development environments from scratch.
- Participation in weekly trainings.

Skills

Top languages

Javascript, Typescript, C#, Java, HTML, CSS.

Top frameworks and libraries

React, Angular, Rxjs, .Net Core, NodeJS, Express, Spring Boot, ASP.NET, Karma, Jasmine.

Tools, platforms, and databases

Docker, NPM, MS SQL Server, MySQL, Mongo Atlas, Jenkins, GitLab CI/CD, GitHub, Jenkins, Heroku, Netlify.

AWS technologies I worked with

S3, ECS, Elastic Beanstalk, EC2, CloudFront, Route53, Secret Manager, IAM, Certificate Manager.

Projects - Courses - Articles - Videos

- ✓ More than 10 certified courses on software development
- ✓ I write technical articles about software development technologies in Medium.
- ✓ I create Spanish video tutorials of software development on YouTube.
- ✓ I have worked on challenging projects throughout my career.

You can check all of them on my personal website!

Education

Systems Engineering

Bachelor of Science

Universidad Católica Boliviana "San Pablo"

2016 - 2020 | Cochabamba, Bolivia

Merits

- Two times academic excellence award for obtaining the highest average in the previous semester among all (300+) systems engineering students.
- Maximum score in the University's Final Project. Graduated as distinguished with honors.
- Three times teaching assistant in my university. Two for Data Structures and Algorithms and one for Introduction to Programming.

Languages

English - B2

Spanish - Native
