

Jose Daniel Oropeza Soria

Software Engineer

EXPERIENCE

Software Engineer @ NICE CXone

April 2021 - Current | Cochabamba, Bolivia

Constant improvement of the product, making migrations from old ASP.NET pages to the newest versions of Angular. Designing components and projects that can be supported by our entire unified platform. Our platform handles Micro-frontends and project versioning with NPM.

Always implementing the code from a maintainable, readable, quality, and user experience point of view. Always implementing the code from the perspective that it will be used by millions of users, localization to more than 12 languages, supporting all time zones, permissions, pagination, background processes, response times, valuable customer data, and so forth.

Technologies: Angular, Rxjs, NPM, Jasmine, Karma, .NET Core, Jenkins, AWS CloudWatch, Docker, SQL Server, MySQL, Jira, GitHub, Confluence.

Full-stack Developer @ DOMUS S.R.L.

January 2020 - March 2021 | Cochabamba, Bolivia

Working directly with the CEO of the company I developed from scratch an information system for management of independent workers of the company DOMUS S.R.L. This system is part of a much larger system that aims to facilitate the search and hiring of independent workers in the city of Cochabamba through our mobile application.

AWS Technologies: Elastic Beanstalk, Elastic Container Service, S3, CloudFront, Certificate Manager, EC2, IAM, Secret Manager, Route53.

Other Technologies: ReactJS with Hooks, Material UI, Spring Boot, Mongo Atlas, Docker, GitLab CI/CD, GitLab Releases, GitLab Registry.

Full-stack Developer @ Truextend

July 2019 - October 2019 | Cochabamba, Bolivia

Development and bug fix of a web application for requesting vacations of the company workers. Working under SCRUM methodology, with Sprint Plannings, Retrospectives, Groomings and Dailys meetings. I developed using good practices such as clean code, refactoring, exception handling and documentation.

Technologies: ReactJS, React Redux, Redux-Saga, Semantic-UI, Spring Boot, MySQL, Hibernate, Swagger, GitLab, Git.

EDUCATION

Systems Engineering

Bachelor of Science

Universidad Católica Boliviana "San Pablo"

2016 - 2020 | Cochabamba, Bolivia

MERITS

- Two times academic excellence award for obtaining the highest average in the previous semester among all (300+) systems engineering students.

- Maximum score in the University's Final Project. Graduated as distinguished with honors.

- Three times teaching assistant in my university. Two for Data Structures and Algorithms and one for Introduction to Programming.

LANGUAGES

Spanish:

English:

*Intermediate: Speaking, Writing, Listening.
Advance: Reading.*
